Case Discounts Are Good for Your Economy

10% Solid Case Wine or Liquor Discount

- **NEW!** The number of bottles in a case of wine or liquor usually varies, usually based on the size of the bottle. For instance, it can be three big bottles, six bottles or 12 bottles. So if your favorite wine or liquor comes in a case of 12, and you buy 12 bottles, you get 10% off. If you buy a 13th, 14th or 40th bottle, those will all be 10% off too. If your favorite wine or liquor comes in a case of six, then you get 10% off when you buy six, seven or 27.

5% Mixed Case Liquor and Wine Discount

- **NEW!** At the Party Source liquor and wine DO mix. Now you can mix and match your own. We don't care if it's all liquor or all wine. Since bottle sizes vary, it requires a little math. **"12" makes a case.**

Use this chart to total 12:

1	750 ml or 1 liter bottle counts as one.
2	1.5 liter or 1.75 liter bottle counts as two.
3	3 liter, 4 liter or 5 liter bottle or box counts as three.

If you find mixing tricky, it's easy as one, two, three, but ask an employee. We only hire math majors as our partyologists. Any one can calculate a case for you. Just ask. And once you've made a case, you get 5% off all further liquor and wine purchases in your cart.
